### CONSTRUCTION

- 1) Standard panels are pre galvanised, or pre painted, pressed steel sheet 0.5mm thickness. "chromadek" coloured panels are available in a range of colours.
- 2) Supporting posts and guides are pre galvanised pressed steel sheet of 1.3mm thickness.
- 3) Centrally located lock and handle combination with locking bars on both sides of door for improved security and easy opening.
- 4) Continuous polyurethane runners fitted to both sides of door curtain ensuring quiet, easy operation. No greasing of guides required.
